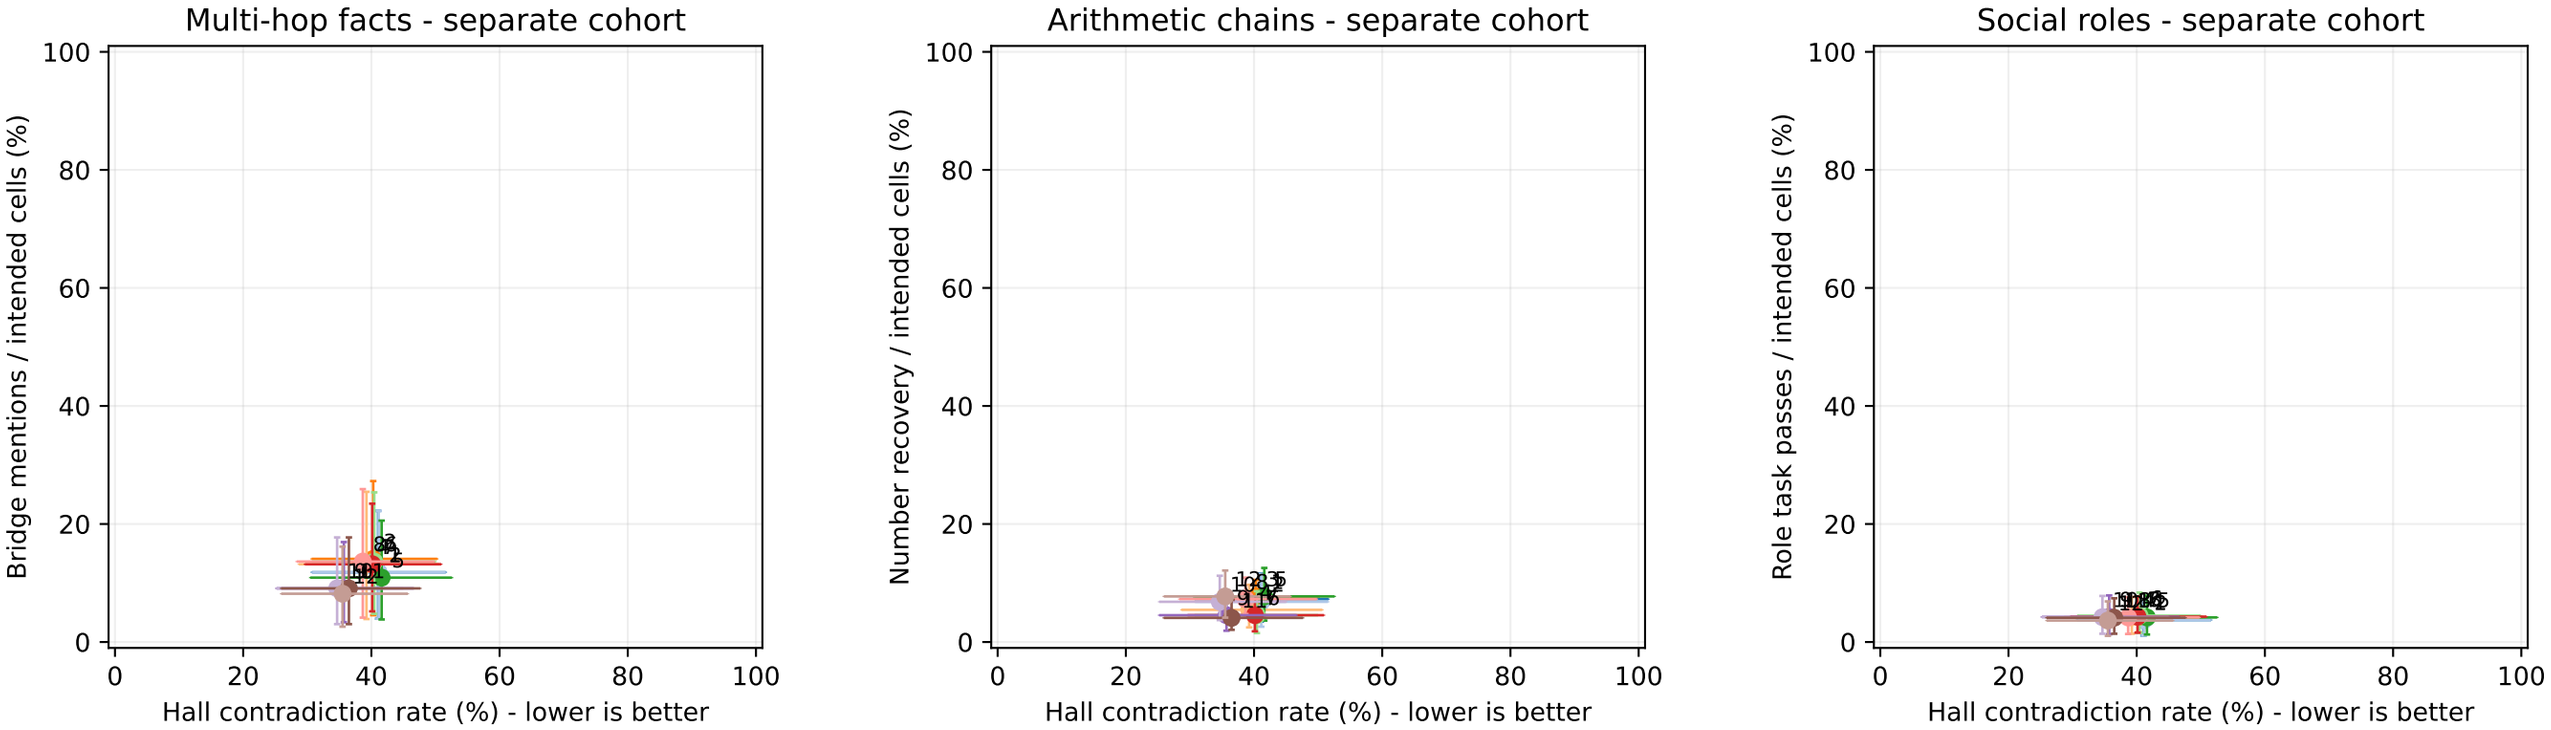
Validation: twelve settings frozen before outcome inspection
Validation cross-task error and recovery
Different item cohorts; not same-item precision/recall or evidence of statistical dominance



1. Original lens (1 sample)
2. Capped single response
3. Best reconstruction (16)
4. Best reconstruction (32)
5. Random eligible response (32 pool)
6. Pool bullets (16)
7. Pool bullets (32)
8. Specificity selection (32)
9. Specificity + pruning (0.005)
10. Specificity + matched random deletion
11. Best 32 + pruning (0.005)
12. Best 32 + matched random deletion

Supplied marginal per-method 95% intervals, not joint intervals. Undefined rates are omitted; no winner or fitted frontier. Source SHA-256 db223a374f51
